

CTech Corporation presents at the 63th IWCS Conference, Rhode Island, US- 9th-12th November 2014

IWCS, 63th International wire and cable symposium held in Rhode Island Conventional Center, US specifically targeting cables companies.

CTech Corporation had been invited by the IWCS, a non-profit organization, presents an annual event in which the latest technologies in product design, materials, applications and processes are presented in a symposium format. The conference has been an important business forum and was attended by senior delegates in various organizations worldwide.

CTech Corporation was invited to present a paper '**Rodents and Insects-A chronic threat to our wires and cables**' which highlighted the threat of rodent and termite to the wires and cables and the extensive damage done by them. The paper presented a low-toxic solution which had been tested in real life testing conditions giving conclusive test results to combat the problem. The paper was presented by the Ms. Prajakta Dhamorikar, Assistant Technical Marketing Manager, CTech Corporation in Rhode Island, US where the conference had been held.

The overall conference was a great opportunity for cable producer, their customers and suppliers to be made aware of the latest material developments and their impact on cable performance and was attended by over 260 delegates from across the global supply chain. The conference brought together cable producers, raw materials suppliers and equipment manufacturers and thus ensured seamless integration of information across the supply chain.
