Repairs complete on Spanish Town Hospital ward infested by termites

August 2, 2019

Health Minister Dr. Christopher Tufton

Repairs have been completed on the Spanish Town Hospital ward which was recently closed due to termite infestation.

Sections of the roof were compromised.

The closure also occurred after a video was released showing rats on a ward at the hospital.

In an interview with *RJR News*, Health Minister Dr. Christopher Tufton said work is being carried out on four other wards at the hospital which are also infested by termites.

He expects normality to return within two months.
